Energy Economics

Index to Volume 14
January, April, July, October 1992

Articles – titles

Electricity supply and demand, pricing

Cost–benefit analyses for the development of magma power, *John Haraden*, 14.4, 255–264

A dynamic model for correcting quarterly electricity consumption data, *Thalassinos El*, 14.3, 186–191

Forecasting residential quarterly electricity consumption in Greece using monthly and quarterly data, *E. Dikaios Tserkezos*, 14.3, 226–232

Integrating the power sector in India: reflections and suggestions, *Philippe R. Scholtès*, 14.2, 119–131

A model of the electricity market in the province of Québec: overview and results, *Danny Bélanger and Jean-Thomas Bernard*, 14.2, 107–118

Nuclear power plant performance: the post Three Mile Island era, *Anthony C. Krautmann and John L. Solow*, 14.3, 209–216

Optimal timing of transmission line investments in the face of uncertain demand: an option value approach, *Spiros H. Martzoukos and Witold Teplitz-Sembitzky*, 14.1, 3–10

Probabilistic production costing under integrated operation agreements and joint power agency financing, *Brian G. Thomas and Darwin C. Hall*, 14.3, 200–208

Supply function equilibria and the danger of tacit collusion: the case of spot markets for electricity, *Friedel Bolle*, 14.2, 94–102

Energy demand and energy efficiency

Decomposition of industrial energy consumption: an alternative method, *S.-H. Park*, 14.4, 265–270

A double horizon peak demand forecast model, *V. Assimakopoulos and J. Psarras*, 14.2, 103–106

An end-use approach to reliability investment analysis, *Clinton J. Andrews*, 14.4, 248–254

Energy planning and environmental quality management: a decision support system approach, *Ben-Chieh Liu, Gwo-Hshiung Tzeng and Chang-Tzeh Hsieh*, 14.4, 302–307

Factors influencing changes in energy consumption: the case of Italy, 1975–85, *Andrea Raggi and Giancarlo Barbiroli*, 14.1, 49–56

Forecasting residential quarterly electricity consumption in Greece using monthly and quarterly data, *E. Dikaios Tserkezos*, 14.3, 226–232

Labour productivity and energy intensity in Australia 1974–87: an input–output analysis, *John M. Gowdy*, 14.1, 43–48

Long-term macroeconomic estimate of energy consumption, *Oleg A. Eismont*, 14.4, 271–273

Measuring the consumer welfare effects of carbon penalties: theory and applications to household energy demand, *Jesus C. Dumagan and Timothy D. Mount*, 14.2, 82–93

Optimal timing of transmission line investments in the face of uncertain demand: an option value approach, *Spiros H. Martzoukos and Witold Teplitz-Sembitzky*, 14.1, 3–10

Residential energy demand modelling in developing regions: the use of multivariate statistical techniques, *V. Assimakopoulos*, 14.1, 57–64

Energy–economy interactions

Accouting for changes in Australian carbon dioxide emissions, *M. S. Common and U. Salma*, 14.3, 217–225

Cost–benefit analyses for the development of magma power, *John Haraden*, 14.4, 255–264

Economic effects of a carbon tax in Belgium: application with the macrosectoral model HERMES, *F. Bossier and R. De Rous*, 14.1, 33–42

Economic effects of a carbon tax: with a general equilibrium illustration for Belgium, *S. Proost and D. Van Regemorter*, 14.2, 136–149

Factors influencing changes in energy consumption: the case of Italy, 1975–85, *Andrea Raggi and Giancarlo Barbiroli*, 14.1, 49–56

Financing waste to energy plants, *Anthony Woodward*, 14.3, 233–236

Identifying no growth years in the US economy: using increases in crude oil prices, *Edward Renshaw*, 14.2, 132–135

The impact of disaggregated energy on productivity: a study of the US manufacturing sector, 1958–85, *John J. Hisnanick and Kern O. Kymn*, 14.4, 274–278

Labour productivity and energy intensity in Australia 1974–87: an input–output analysis, *John M. Gowdy*, 14.1, 43–48

Long-term macroeconomic estimate of energy consumption, *Oleg A. Eismont*, 14.4, 271–273

Measurement of temperature in economic systems considered as thermodynamic models, *Dennis G. Collins*, 14.1, 73–78

Myth of energy competitiveness in energy producing countries: comparative analysis between Indonesia and Japan, *Chihiro Watanabe and Tjahya Widayanti*, 14.4, 291–301

Oil price, capital mobility and oil importers: a general equilibrium macro analysis, *Arturo González-Romero*, 14.1, 11–22

Optimal economic growth when CO_2 constraints are critical, *Hans W. Gottinger*, 14.3, 192–199

Energy and environment

Accounting for changes in Australian carbon dioxide emissions, *M. S. Common and U. Salma*, 14.3, 217–225

A carbon tax to reduce CO_2 emissions in Europe, *Paola Agostini, Michele Botteon and Carlo Carraro*, 14.4, 279–290

Economic effects of a carbon tax in Belgium: application with the macrosectoral model HERMES, *F. Bossier and R. De Rous*, 14.1, 33–42

Economic effects of a carbon tax: with a general equilibrium illustration for Belgium, *S. Proost and D. Van Regemorter*, 14.2, 136–149

Energy planning and environmental quality management: a decision support system approach, *Ben-Chieh Liu, Gwo-Hshiung Tzeng and Chang-Tzeh Hsieh*, 14.4, 302–307

Financing waste to energy plants, *Anthony Woodward*, 14.3, 233–236

Measuring the consumer welfare effects of carbon penalties: theory and applications to household energy demand, *Jesus C. Dumagan and Timothy D. Mount*, 14.2, 82–93

Optimal economic growth when CO_2 constraints are critical, *Hans W. Gottinger*, 14.3, 192–199

Energy pricing

A carbon tax to reduce CO_2 emissions in Europe, *Paola Agostini, Michele Botteon and Carlo Carraro*, 14.4, 279–290

A dynamic model for correcting quarterly electricity consumption data, *Thalassinos El*, 14.3, 186–191

The dynamic stability of OPEC's oil price mechanism, *Shawkat Hammoudeh and Vibhas Madan*, 14.1, 65–72

Economic effects of a carbon tax in Belgium: application with the macrosectoral model HERMES, *F. Bossier and R. De Rous*, 14.1, 33–42

Economic effects of a carbon tax: with a general equilibrium illustration for

Belgium, *S. Proost and D. Van Regemorter*, 14.2, 136–149
Maturity effects in energy futures, *Apostolos Serletis*, 14.2, 150–157
Measuring the consumer welfare effects of carbon penalties: theory and applications to household energy demand, *Jesus C. Dumagan and Timothy D. Mount*, 14.2, 82–93
Myth of energy competitiveness in energy producing countries: comparative analysis between Indonesia and Japan, *Chihiro Watanabe and Tjahya Widayanti*, 14.4, 291–301
Petroleum taxation under uncertainty: contingent claims analysis with an application to Norway, *Diderik Lund*, 14.1, 23–32
Returns to scale, adjustment costs and the optimal investment of the mining firm, *Santiago J. Rubio*, 14.3, 163–170
Symmetric or asymmetric price adjustments in the oil market: an empirical analysis of the relations between international and domestic prices in the Federal Republic of Germany, 1972–89, *Gebhard Kirchgässner and Knut Kübler*, 14.3, 171–185

Oil and gas supply and demand

The dynamic stability of OPEC's oil price mechanism, *Shawkat Hammoudeh and Vibhas Madan*, 14.1, 65–72
Identifying no growth years in the US economy: using increases in crude oil prices, *Edward Renshaw*, 14.2, 132–135
The impact of disaggregated energy on productivity: a study of the US manufacturing sector, 1958–85, *John J. Hisnanick and Kern O. Kymn*, 14.4, 274–278
Oil price, capital mobility and oil importers: a general equilibrium macro analysis, *Arturo Gonzalez-Romero*, 14.1, 11–22
Petroleum taxation under uncertainty: contingent claims analysis with an application to Norway, *Diderik Lund*, 14.1, 23–32
Symmetric or asymmetric price adjustments in the oil market: an empirical analysis of the relations between international and domestic prices in the Federal Republic of Germany, 1972–89, *Gebhard Kirchgässner and Knut Kübler*, 14.3, 171–185

Public utility regulatory economics

An end-use approach to reliability investment analysis, *Clinton J. Andrews*, 14.4, 248–254
Integrating the power sector in India: reflections and suggestions, *Philippe R. Scholtès*, 14.2, 119–131
A model-referenced procedure to support adversarial decision processes: application to electricity planning, *D. W. Bunn and K. Vlahos*, 14.4, 242–247
Probabilistic production costing under integrating operation agreements and joint power agency financing, *Brian G. Thomas and Darwin C. Hall*, 14.3, 200–208
